

# Corporate Partner webinar selection

Last Modified on 12/04/2023 10:00 am EST

In late November/early December, run this query to get a list of quality webinars from the current year:

Review the list and select any webinars you'd like to add to the renewing/new CPs options. Cross-check these selections with the **repository of recorded webinars** to ensure we have the recording (sometimes we don't receive the recording, or the webinar wasn't recorded at all.)

Review and update the **list of webinar descriptions** based on the choices made in the previous step; some outdated webinars may need to be removed from the list of options. Save this file as a PDF to be linked to the portal.

Notify Leena of the current list of options so she can update the selection form and list of webinar links.
